There are a plethora of brands that produce wireless headphones and/or wireless earphones with different features and at different prices. Make sure you consider your budget and what features are most important to you and your staff. What is the difference between bluetooth and wireless headphones? the simple answer is: all bluetooth headphones are wireless, but not all wireless headphones have bluetooth. In general, the best wireless headphones will have bluetooth technology and many other features that make it a good investment. could also appreciate: qualified for discounts, special offers and more with a first business account of amazon. you can create a free account to start today.
